

Volume 26, Number 4, August 2025

CONTENTS

Research Articles

Prediction of high-temperature explosion spalling in Ultra-High-Performance concrete based on intervention analysis of hybrid fiber performance	<i>Chenhao Xu and Chunhong Guo</i>	535
Suitability of clays from Maroua (Far North Cameroon) and physical properties of their adobe bricks reinforced with staff waste powder for eco-friendly construction	<i>Bertin Pagna Kagonbé, Klamadji Moussa Ngarena, Özgür Cengiz, Djoulaiyatou Djallo, Soureiyatou Fadil-Djenabou, Viviane Djaoyang Bakainé, Etienne Yanné, Frédéric Pagoré Djoda and Débonnaire Bandeya</i>	547
Effects of blending bagasse with an aluminosilicate-based additive on bagasse ash properties	<i>Ji Yeon Park, Byoung-In Sang, Kwonho Jeon, Sangmin Choi, Byoungdae Min and Jin Hyung Lee</i>	559
Home and in-office bleaching effect on stained hybrid nanoceramic and zirconia-reinforced lithium disilicate CAD-CAM materials	<i>Şükriye Ece Doğan, Gaye Sağlam, Merve Acar and Emel Evci</i>	567
Synergistic design and hydration mechanism of seawater-resistant low-heat cement using industrial byproducts	<i>Peng-fei Zhao, Hai-tao Wang, Eng-dong Hua and De-zhi Wang</i>	573
Green synthesis of CuO nanoparticles for photocatalytic applications: structural and optical characterization	<i>Reyhan Gitmiş and Ayça Tanrıverdi</i>	586
Design, modelling and verification of a fully decoupled large-stroke compliant motion stage	<i>Xinyu Liu</i>	596
Valorization of wastewater sludge into carbon materials for energy storage applications: feasibility and economic assessment	<i>Saehee Lee, Chanwoo Kim, Uijun Lee, Hyeonmin Jo, Hee-Dae Lim and Byoung-In Sang</i>	606
Sustainable interlocking ash bricks with green waste lime - ceramic fines: improving performance and longevity	<i>S. Manishankar and K. Vidhya</i>	618
Systematic optimization of sol-gel synthesis parameters for SiO ₂ nanoparticles derived from immature rice ash and sugarcane bagasse ash	<i>M. Selva Prathipa and Dr. A. Arivumangai</i>	628
Stability evaluation and reinforcement methods of bored pile wall - taking the southeast coastal area as an example	<i>Zhe Wang, Weitao Shi, Fucheng Yu, Jinhong Su, Qiwan Zhang and Xinying Ai</i>	635

The effect of sintering temperature on the strength and electrical properties of Porcelain Alumina Ceramic Insulator (PACI) materials	<i>Wahyu Garinas, Ahmad Fauzi, Haerul Hidayaturrahman, Yanto Sudiyanto, Wahyu Hidayat, Nur Ikhwan, Yeni Novitasari, Vany Nursanti, Arif Suryanegara and Fajar Yudi Prabawa</i>	646
Study on the distribution characteristics and solidification mechanism of heavy metal ions in polycrystalline slag glass-ceramics	<i>Yuanjun Xu, Hongxia Zhang, Yongsheng Du, Zhishuang Pan and Xuebing Xue</i>	661
Morphology and size control of 513 MSH, $Mg(OH)_2$ from sea bittern using H_2SO_4 and NH_4OH	<i>Jiyeon Kim, HyunSeung Shim, YeongJo Yun, Seong-Ju Hwang and YooJin Kim</i>	672
Synthesis, characterization, and machinability of copper matrix composites reinforced with micro and nano-sized Si_3N_4 and AlN particles	<i>Harikishore S and Mathalai Sundaram C</i>	680
Evaluating ceramic powder flow and shrinkage for binder jetting in heritage artifact fabrication	<i>Qi Chen Yu and Qiang Liu</i>	690
Assessing post-consumer ceramic waste recovery collection logistics and processing technologies	<i>Huiyi Liu and Youliang Zhou</i>	694
Residual strength and thermal stability of sustainable high-strength concrete using ceramic waste	<i>Ma Xiangming and Wang Zhigang</i>	698
