CONTENTS

Research Articles

Comparative analysis of four different fly ash sources as additives in porcelain ceramics: microstructural and mechanical characterization	*I. Erdogan, H. Kursun, U. Onen, T. Boyraz and T. Kursun*	703
Physicochemical properties of hydroxyapatite from *Polymesoda erosa* shells and antibacterial potential of HA-ZnO composites	*Endang Haryati, Jumiarti Andi Lolo, Ahmad Kusumaatmaja and Yusril Yusuf*	717
Morphological & physical characteristics of Ceria (CeO_2) doped Zirconia Toughened Alumina (ZTA) ceramics composites	*Bipin Kumar Singh, A. Selvarasu, P. Ganeshan and K. Raja*	726
Identification of layer thickness and rheological properties of ceramic shell slurry of investment casting	*Agus Edy Pramono, Arif Dermawan and Nanik Indayaningsih*	734
Study on cobalt-blue pigment of blue-and-white porcelain from the Zhengde imperial kiln of Ming Dynasty (AD 1506-1521)	*Xiaolong Li, Weixia Dong, Qifu Bao, Zhipeng Chen, Yulong Yang, Kun Liu and Jianer Zhou*	742
Experimental and mechanistic study on the lubrication of Si_3N_4 full-ceramic ball bearings by PTFE self-lubricating cage material under low-temperature conditions	*Chao Wei, Songhua Li, Yonghua Wang, Kun Wang, Jining Zhao and Shouqi Liu*	754
Improving long-term corrosion resistance of high-performance concrete through the incorporation of micro silica and chemical admixtures	*Sivakumar Arunachalam, Anandakumar Subbaiyan, Sampathkumar Velusamy and Hema Sudhakar*	767
Experimental investigation and process parameters optimization for abrasive water jet machining using desirability function analysis	*Balasubramaniam Vellaisamy, Murugan Kuppusamy, Venugopal Thangamuthu and Sivakumar Aburpa Avanachari*	779
Properties of nickel ferrite ceramics obtained by combustion synthesis and two-step sintering, and their detection of LPG in air	*Nihafini Kasor, Methee Promsawat and Tawat Chanadee*	787
Hierarchically integrated NiFe LDH/Ni_3S_2 on Ni foam as a highly efficient electrocatalyst for alkaline oxygen evolution	*Yun Seok Jang, Tae Kwang An, Dong Hyun You and Jeong Ho Ryu*	796

Porosity-dependent mechanical behavior of alumina and zirconia-toughened ceramics for next-generation sports equipment	*An Di*	*803*
Synthesis and high-temperature oxidation resistance of SiC-ZrB_2 composite powders via carbothermal reduction	*Yu Cao, Yueming Li, Kai Li, Chuanming Zou, Jilin Hu and Jin Wen*	*807*
Design of spherical/conical seal structure for tubing or casing premium threaded connections based on Hertz theory	*Cheng Wang, Han Shan and Lianxin Gao*	*815*
Study of melting properties of phase change materials at different inclination angles and heating boundaries	*Peng Hu*	*824*
Utilization of waste ceramics for high-performance thermal insulation materials with optimized compressive strength	*Hehong Ma, Hui Zhang and Ruiwen Li*	*834*
Balancing mechanical strength and surface texture in porous ceramics for handicraft design	*Zhenpeng Zhao*	*839*
Sustainable biomaterials: hydrothermal synthesis of carbonated hydroxyapatite from buffalo bone waste	*Jumiarti Andi Lolo, Endang Haryati, Muhammad Arifin and Yusril Yusuf*	*843*
Test research and performance analysis of the mountain-shaped retreating terrace style lapping column transfer structure	*Zhicheng Bai, Xiaoxia Zhao, Baoan Zhang, Yang Yang, Zhiyuan Zhang and Yongyan Li*	*852*
Parametric optimization for maximization of material removal rate in turning of mild steel using taguchi six sigma technique	*Senthil Kumar Natarajan, Karthick Sekar, Dhanenderan Natesan and Senthil Kumar Kuppuswamid*	*864*
Fiber laser micro machining of stainless steel - process parametric optimization by integrated taguchi and grey relation analysis technique	*C. Gopinath, S.D. Dhanesh Babu and S. Kanthasamya*	*870*
High-Electric-Field-Induced strain at a low driving field in lead-free $0.78Bi_{0.5}Na_{0.5}TiO_3$-$0.22SrTiO_3$ ceramics modified with $KNbO_3$	*Duc Thang Le, Seong Won Kim, Subramanian Sasikumar and Jeong Ho Cho*	*886*
Titanium diboride nanopowders: New horizons for the enhancement of *in vitro* bioactivity and bone regeneration	*Chuang Qian, Peiwei Yang, Lihong He and Meixiong Zhan*	*894*
